

SCALE SD

Stopping Revenue Leakage for Contractors.

Scale SD, LLC | San Diego, California

Founded: February 2026 | **Active MRR:** ~\$7,000/month | **Clients Served:** 8 contractors

COMPANY OVERVIEW

Most marketing agencies want your credit card. We want your close rate.

Before Scale SD runs a single ad for a contractor, we look at what happens after the lead comes in. If your front office is bleeding leads, more advertising just means bleeding faster. We fix the leak first.

We are a San Diego-based marketing and automation agency built exclusively for contractors and local service businesses. We are a tight, four-person team—not a faceless agency. Daniel J. Loarca, our owner, is on every strategy call. Ashen manages our systems and AI operations. We are building toward our next successful client, not a generic pitch deck.

Our strategic position is revenue partner, not marketing vendor. We help you close the leads you are already losing by deploying immediate missed-call recovery, automated follow-up sequences, and seamless appointment booking. Once that foundation is locked in, we scale with paid ads.

WHO WE ARE NOT FOR

We turn down business every month.

- You want ads running before your team can consistently answer the phone.
- You're in e-commerce, restaurants, or outside home services.
- You need a 20-person agency with a Manhattan office and a matching invoice.
- You've burned through three agencies and you're "just testing" a fourth.

CORE SERVICES

SERVICE	WHAT IT ACTUALLY MEANS FOR YOUR BUSINESS
GHL Automation Stack	Missed-call text-back in under 60 seconds. Automated multi-touch follow-up. Appointment booking. Your pipeline runs and captures leads while you are on a job site.

Meta & TikTok Advertising	Paid campaigns built around contractor customer psychology, not stock-photo templates. Real competitor analysis.
CRM Build & Setup	Full GoHighLevel pipeline with live visibility into every lead from first touch to signed contract—not a monthly PDF with vanity metrics.
Social Media Management	Content that builds credibility with homeowners before the first call.
Foundation Package	The infrastructure everything else runs on: Website, Google Business Profile, brand identity, and local SEO. One-time build, yours permanently.

MEASURABLE RESULTS & CLIENT ROSTER

We measure success by closed jobs and speed-to-lead.

- **EMSR (Emergency Mitigation Services Restoration):** \$2,500/mo + 8% ad spend. Running Meta and TikTok paid ads with a cascading social strategy.
- **California Doors & Windows:** \$2,000/mo. 35-year family-owned contractor in San Diego.
- **Tony — Pool Contractor:** Active client scaling local operations.

Verified Industry Partners:

Star Builders Inc | Designer Window Supply | Gutierrez GC | United Design Group | World Pools Inc
| SC Floors

THE 60-SECOND RULE: OUR AUTOMATION LAYER

What happens when a lead calls your business at 2 PM while you are on-site and the call goes unanswered?

- **Under 60 Seconds:** The lead receives an automated text: *"Hey, this is [Your Business] - missed your call. Can I get you scheduled?"*
- **Long-Term Nurture:** If they don't respond in 24 hours, they receive a customized follow-up. Another at 72 hours.
- **Booking:** If they book, they receive a confirmation and a reminder. No-shows drop. Jobs fill.
- **Total Visibility:** You see every touchpoint in a live pipeline dashboard.

THE HARD LINE

We will not run paid ads for a business whose average lead response time exceeds five minutes. Not because we can't—because it would be a waste of your money, and we would be the agency that took it anyway. That one policy has cost us deals. It is also the exact reason the contractors who do sign with us stay. We fix the leak before we open the tap.
