

What is EMS?

EMS Restoration — Client Overview for Ads Team

EMS Restoration is a San Diego based full service damage restoration and remodeling company owned and operated by U.S. Army veteran Joseph Fiasco. They serve San Diego County and are available 24 hours a day, 7 days a week. Their license number is 1081134 and their website is emsrestorations.com.

What They Do

EMS Restoration operates in two distinct but connected business areas.

The first is emergency damage restoration. When a homeowner experiences water damage, fire damage, mold, or a biohazard situation, EMS is the company they call. These are high urgency, high intent situations where the customer needs help immediately and is not shopping around for long. Speed of response and trust are the primary decision factors. EMS has handled over a thousand insurance claims and works directly with homeowners to navigate the process from damage assessment through full restoration.

The second is remodeling and reconstruction. EMS is a fully licensed general contractor offering kitchen and bathroom remodels, full reconstructions, home additions, ADU builds, and multi-family and HOA work. This side of the business is planned and aspirational rather than emergency driven. The customer here is a homeowner ready to invest in upgrading their space.

Both sides of the business feed each other. A homeowner who comes in through an emergency restoration job may become a remodeling client later. A remodeling client who has a great experience may call EMS first when an emergency happens.

The Customer

There are two distinct customer profiles.

The emergency customer is a homeowner in crisis. They are panicked, searching on their phone, and making a decision fast. They are looking for someone available now, trustworthy, and local. Reviews, certifications, and response time are everything to them. They are not price shopping. They need the problem solved.

The remodeling customer is planned and deliberate. They are a homeowner, property manager, landlord, or real estate professional who has a project in mind and is evaluating contractors. They care about quality, proof of past work, and communication. They are comparing options and may take days or weeks to decide.

Why This Account Matters for Ads

Joseph's business model generates high value contracts. A single restoration job can run anywhere from 10,000 to 100,000 dollars depending on the scope of damage. A remodeling project runs 10,000 to 30,000 dollars on average. This means a single converted lead from our ads can generate significant revenue for the client, which means our ads need to be high quality and targeted, not just high volume.

His current cost per scheduled appointment is a minimum of 456 dollars based on 8 clicks at 57 dollars per click at current CPC rates for general construction. His target is 250 dollars per scheduled appointment. That is the number our ads need to hit and eventually beat.

He previously had 84 leads per month coming in from other sources and turned them all down to restructure the business. He is not in survival mode. He is optimizing for quality, scalability, and brand authority. He wants to scale ad spend to 40,000 dollars per month by end of year.

The Ads Strategy in Brief

We are running ads across Meta, Instagram, and TikTok. The strategy operates in three phases.

Foundation is about building the content base and getting all systems in place before spending heavily. We are producing organic content, setting up the CRM lead flow through GoHighLevel, building landing pages on his WordPress server, and establishing competitive intelligence systems before the first dollar of serious ad spend goes out.

Testing is about finding what works. We launch initial ads using the best performing organic content as creative, test different formats, audiences, landing pages, and messaging types, and optimize first for lead form fills and then for scheduled appointments specifically. We track leads all the way from form fill to scheduled appointment using API integrations so we are optimizing on the metric that actually matters to Joseph, not just vanity metrics.

Acceleration is about scaling what works. Once we hit 250 dollars per scheduled appointment consistently, we increase ad spend by 15 to 20 percent per week maximum, allocate 70 to 80 percent of budget to proven creatives and 20 to 30 percent to continuous testing, and use cost caps to prevent the cost per appointment from drifting above 250 as spend scales.

Key Details to Know

Joseph is a numbers guy. He wants data, not narrative. Every conversation with him needs to be grounded in metrics and results.

Peak season runs January through end of June. We signed on April 9th which means we have roughly 6 to 8 weeks of peak season left. Speed of execution is the most important variable right now.

All landing pages are hosted on his privately managed WordPress and Elementor server. We design and deliver the assets. He controls the hosting environment entirely.

CRM is GoHighLevel. Every lead must trigger an immediate email and text notification to Joseph the moment it comes in. Lead flow reliability is non-negotiable for this client.

Bot filtering is a priority at scale. As ad spend increases, bot volume increases. Forms need to be designed to filter out low quality leads before they enter the pipeline.

Finalized Outline

Finalized Outline and Critical Information

FOUNDATION PHASE

- Get access to all media files, Meta ads account, Instagram account, and TikTok account. Create a TikTok ads account if one does not exist.
- Set up CRM notifications to trigger an email or text immediately every time a lead comes in. Test the lead flow to confirm it is working.
- Set up a system that constantly monitors competitors and tracks high performing ads and organic content locally and nationally on Meta and TikTok. Conduct competitive research on what ads and organic content are working right now — hooks, formats, messaging. Build a roadmap of formats to test using existing media and identify what new media needs to be filmed.
- Create a media needs list and set up filming dates at locations to ensure new content is captured based on working scripts if necessary. Use existing and new media to populate all accounts. Remodel profiles with proper graphics, story covers, and bios.
- Begin filming projects and posting on a regular basis. Cycle content every other day between platforms with SEO oriented captions for better discovery. Build organic interactions and test content for the best retention metrics and engagement.
- Combine gathered internal analytics and metrics from the organic content we are creating with competitor intelligence to create a well-informed content and ad development plan.
- Foundation is complete when we have a solid base of organic content, a clear brand voice, and are ready to begin boosting posts with ad spend. We build the foundation first to reduce wasted ad spend on initial development challenges and establish an effective brand voice before scaling into paid advertising.

TESTING PHASE

- Launch initial ads across Meta and TikTok using graphics, carousels, and video formats. Use previously existing organic content, competitor intelligence, and organic analytics gathered in the foundation phase to inform the first round of creative and messaging.
- Connect APIs to track leads from form fill all the way to scheduled appointment.
- First optimization layer: optimize audiences and creatives for lead form fills at the lowest cost possible.
- Second optimization layer: once appointment data is coming in, shift optimization target to scheduled appointments specifically and compare performance against the form fill optimization to see which produces a better cost per scheduled appointment.
- Systematically test landing pages, forms, audiences, and messaging types to find what drives the highest conversion to scheduled appointments at the lowest cost.
- Continuously allocate the most budget toward the best performing creatives. As content starts generating leads, lean into those pieces more aggressively and cut what is not working.
- Hone brand voice, retargeting strategy, content formats, ad spend allocation, and form conversions through continuous iteration.
- Use a feedback loop of internal analytics, form conversion data, and competitor intelligence to inform every new round of creative and targeting.
- Testing is complete when cost per scheduled appointment hits 250 dollars consistently.

ACCELERATION PHASE

- Scale ad spend toward 40,000 per month increasing budget by a maximum of 15-20% per week to avoid resetting Meta's learning phase and degrading lead quality.
- Allocate 70-80% of budget toward proven creatives and audiences that are already converting. Use the remaining 20-30% to continuously test new creatives, audiences, and formats.
- Rotate and refresh creatives on a regular basis to prevent ad fatigue. As spend increases audiences see the same content more frequently and

performance drops. Fresh creative is the primary tool for fighting this at scale.

- Use cost caps to keep cost per scheduled appointment from drifting above 250 dollars as spend increases. This tells Meta to optimize within the target cost rather than just maximizing volume.
- Expand horizontally into new audiences, geographies, and project types to find new volume without saturating existing audiences.
- Monitor lead quality metrics continuously, not just lead volume. As spend scales, both volume and low quality leads increase. Tighter forms and audience filtering are the main tools for keeping lead quality high.
- Sustainable acceleration and solving the problems that come with growth is the most important process in this phase. Scaling spend without maintaining lead quality and cost per scheduled appointment undermines everything we built in the testing phase.

Growth Plan

EMS Restoration – Marketing Growth Plan

1. Growth Goals

First 90 Days (Foundation Phase)

- Fix all lead tracking, routing, and notification systems
- Establish a clean, professional, and trustworthy online presence
- Build a consistent content engine (organic + paid-ready assets)
- Ensure every lead is captured, tracked, and responded to instantly
- Launch structured posting across Instagram, Facebook, TikTok, and Google
- Begin testing paid ads with proper tracking in place

6 Months (Growth + Scaling Phase)

- Achieve consistent, qualified lead flow monthly
 - Hit target: **<\$250 per scheduled appointment**
 - Scale ad spend efficiently toward **\$40,000/month**
 - Increase close rate through better lead qualification + follow-up
 - Build a recognizable brand in San Diego and surrounding markets
 - Expand into a scalable **lead generation + project monetization model**
-

2. Core Growth Strategy

Growth is driven by three integrated pillars:

A. Lead Infrastructure (Highest Priority)

Fix tracking, notifications, and conversion systems

👉 This is where revenue is currently being lost

B. Content Engine (Trust + Authority)

Show real work, real projects, real results

C. Paid Ads (Scalable Lead Generation)

Drive consistent, predictable lead flow

3. Lead Infrastructure (Critical Fix)

Current Problem

- Leads are being generated but not captured or followed up
- No notifications, no tracking, no pipeline visibility
- Result: **Lost revenue despite demand**

System Implementation

CRM + Pipeline Setup

- Centralized system (GoHighLevel or similar)
- Track every lead from:
 - Form fills
 - Calls
 - Messages
 - Ads (Meta, TikTok, Google, Yelp)

Instant Notifications

- SMS + Email alerts **immediately when a lead comes in**
- Internal team notified in real time

Lead Qualification System

- Filter bots vs real prospects
- Pre-qualify leads before calls

Automated Follow-Up

- Instant response:

- “We received your request—when are you available?”
- SMS + email sequences
- Reminder system for missed responses

Call & Form Tracking

- Unique tracking numbers
- Attribution per platform

👉 Goal:

- Never miss a lead
 - Respond within minutes
 - Track ROI accurately
-

4. Digital Presence Optimization

Platform Setup & Fixes

- Meta (Facebook + Instagram) fully rebuilt
- TikTok Ads account created and configured
- Google Business Profile optimized
- Yelp + directories cleaned and tracked

Website & Funnel

- Keep existing WordPress/Elementor site
 - Improve:
 - Lead forms (connected to CRM)
 - Click-to-call functionality
 - Landing page tracking
-

5. Content Production System

Core Issue

Strong real-world operations → weak online presence

Solution

We handle everything:

- Filming
 - Editing
 - Posting
 - Strategy
-

Monthly Content Shoot

2–3 hours on-site

Capture:

- Active job sites
 - Before/after transformations
 - Team + process footage
 - Testimonials
 - Emergency response clips
-

Posting System (Cyclical Model)

Post every other day per platform:

- Day 1 → Facebook
- Day 2 → Instagram
- Day 3 → TikTok
- Repeat

Stories: 3–5x per week

Also posted to:

- Google Business Profile
-

Content Types

- Before / After transformations
- Job site walkthroughs
- Educational content
- Testimonials
- Process videos
- Authority positioning

👉 Goal:

- Build trust
 - Increase engagement
 - Improve ad performance
-

6. Paid Ads Strategy (Meta + TikTok)

Phase 1 – Foundation (Weeks 1–4)

- Rebuild Meta ad account
 - Launch TikTok ads
 - Use existing + new content
 - Focus: **lead form conversions**
-

Phase 2 – Testing (Months 2–3)

- Test:

- Creatives
 - Audiences
 - Messaging
 - Optimize for:
 - Cost per lead
 - Cost per scheduled appointment
-

Phase 3 – Acceleration (Months 4–6)

- Scale budget gradually (**15–20% increases**)
 - Allocate:
 - **70–80% → winning ads**
 - **20–30% → testing new creatives**
 - Introduce:
 - Retargeting campaigns
 - Lookalike audiences
 - Cost caps to maintain <\$250/appointment
-

Ad Creative Strategy

Monthly Output:

- 12–16 creatives
- 8–10 videos
- 4–6 static/carousels

Winning Angles:

- Problem → Solution
- Before / After
- Testimonials
- Educational
- Behind-the-scenes

7. Google & Local SEO

Focus Areas

- Google Business Profile optimization
- Weekly posting
- Review generation
- Local keyword targeting

Goal

- Capture **high-intent local searches**
 - Drive inbound calls organically
-

8. Lead Conversion System

Immediate Response Flow

Lead comes in → instant SMS/email → follow-up → booked appointment

Optimization Layers

1. Optimize for **lead form fills**
2. Then optimize for **scheduled appointments**

Target Metrics

- <\$250 per scheduled appointment
 - Improved close rate
 - Reduced wasted leads
-

9. Growth Timeline

Month 1

- CRM + lead system setup
 - Fix Meta, IG, TikTok accounts
 - First content shoot
 - Begin posting
 - Launch initial ads
-

Month 2

- Second content shoot
 - Continue posting
 - Optimize ads
 - Begin retargeting
-

Month 3

- Third content shoot
 - Refine funnel
 - Build strong content library
 - Hit consistent lead flow
-

Months 4–6

- Scale ads toward \$40K/month
 - Expand audiences + markets
 - Increase lead quality
 - Grow brand authority
-

10. Key Metrics (KPIs)

Months 1–3

- Cost per lead
- Lead response time
- Lead capture rate
- Engagement

Months 4–6

- Cost per scheduled appointment
 - Close rate
 - Cost per acquisition
 - Monthly lead volume
 - Average job value
-

11. Deliverables (Scale SD)

A. Social Media Management

- Instagram + Facebook + TikTok
 - Posting every other day (cyclical)
 - Stories 3–5x/week
 - Content calendar
-

B. Paid Ads Management

- Meta + TikTok ads
 - Campaign setup + optimization
 - Retargeting + scaling
 - Monthly reporting
-

C. Content Production

- Monthly shoots
 - Editing
 - Creative strategy
-

D. Lead System & CRM

- Full setup
 - Automation
 - Tracking
 - Optimization
-

12. Client Responsibilities

- Provide access to accounts
 - Share project locations
 - Respond to leads quickly
 - Approve content when needed
 - Send testimonials
-

13. Pricing Structure (Recommended)

Initial Setup / Consulting

- CRM + tracking + ad account rebuild

Monthly Management

- Social media
- Ads
- Lead system optimization

Content Production

- Monthly filming + editing

👉 Starting point: **\$2,500/month**, scalable with workload

14. Key Strategic Insight

EMS Restoration does not have a demand problem.

It has a **lead handling, tracking, and conversion problem.**

Fixing this unlocks:

- Existing 84+ monthly leads
 - Higher close rates
 - Scalable revenue growth
-

15. Expected Results

Months 1–2

- Fully functional lead system
- Consistent content
- Early lead improvements

Months 3–6

- Predictable lead flow
- Improved cost efficiency
- Strong brand presence
- Higher-value projects

Unfiltered Thinking

All Ideas and Thoughts

Joseph's goal with hiring us is simple. He wants us to generate and manage a scalable system on Meta and Tiktok that generates 250 dollars per scheduled appointment or less. It takes roughly 8 clicks to get a scheduled appointment, and each one is 57-86 dollars per click.

The first problem he said he wants solved is fixing the actual lead management when coming from meta ads, as he claimed a lot of the leads were getting lost/their information was being lost in the process. So we can fix that first.

Secondarily, currently the cost per scheduled appointment minimum is 456 (57×8). He wants that number at 250. The main way we are planning on lowering this number is increasing the quality of the ads, having a cycle of optimization that improves and increases conversions over time, and utilizing forms on meta to have lower friction for scheduling appointments.

The next issue that we are going to solve for Joseph is the bot problem at scale. We will reduce the amount of bots by filtering them with forms geared towards identifying real customers.

The system that we will be developing for Joseph will be as follows for ad metric improvements

Competitive analysis/Analytics → Recreate successful campaigns → See what's working → Repeat

Create advertising ecosystem on meta and instagram → Send all leads generated by email.

We also want to generate brand content from all of the resources he already has, test what is working in terms of organic outreach in the cyclical post cycle, and then we want to advertise the ones that are working the best to start. This will be the initial system. Once we have that running, we will be able to create different ads for different projects, and see where the main spend is going. The main question when

you have a lot of ad spend is how many leads can you generate per cost at scale, what is the quality of the leads.

- Here's what we're going to do - the execution proposal
- Here's the price for what we're offering. 2500 monthly flat for producing advertising content, posting every other day on tiktok, instagram, facebook. We're going to try 8% of ad spend monthly.

So what exactly are we going to be doing for Joseph? Expanding and optimizing his digital ecosystem for generating leads on Facebook, Instagram, and Tiktok.

We are going to be posting graphics, videos, carousels, and other image posts on all platforms and optimizing these posts for conversions to sales. Should we start with organic content?

We need to start by organizing and accessing his content library for our systems. That is going to be the first step. The second step is going to be researching the competitors for what ads they are currently running and abstracting what is working from that content, and reproducing it for the brand. We will use Meta ads manager as well as web scrapers for organic content to get a large dataset of information to find trends in what is and isn't working right now. Third we will begin creating content based on this competitive analysis and testing which creatives work best and which ones don't. We are going to initially focus a lot of the budget on testing and cold audiences to find what kind of content works for what audiences for different sectors of jobs. We want to start with some flagship ads and getting some general creative ads done, and then we want to branch out with more ads after that in each area of the business. We also want to focus on retargeting ads as well. When someone shows interest in your profile but doesn't fill out a form, we want to make sure we can retarget them to increase rates...

The most important thing to remember about Joseph is that he is a numbers guy, he is a straightforward person. He wants numbers and a strategy on achieving them without jargon or fluff. Simple, straight, to the point. SO the strategy must be numbers based and how we achieve that. Why are we building a brand? What does that relate to getting conversions?

Here is everything we are going to do

1. Get access to his login information and content library.
2. Set up Meta, Instagram, Facebook, and TikTok accounts properly for advertising setup and fix the lead management system so leads stop getting lost. Every lead that comes in needs to trigger an email notification immediately with their information.
3. Set up the initial forms and landing pages for lead capture and filtering across all platforms.
4. Shoot and produce content and manage posts on all platforms. Cyclical posting every other day rotating across Facebook, Instagram, TikTok, and Google Business Profile.
5. Run ads on Meta, Instagram, and TikTok.
6. Get cost per scheduled appointment to 250 dollars or less. Currently sitting at a minimum of 456.
7. Scale ad spend to 40,000 per month by end of year.

How are we going to accomplish each of these?

It seems to me that these are all set up into three distinct phases. Foundational phase. Testing phase. Acceleration phase. First, we get all the info, set up all the accounts to centrally advertise, gather all the resources and content, and create the systems for competitive analysis and recursive analytic improvements for the ad ecosystem on what drives down the dollar to scheduled appointment ratio as much as possible. Next is the testing phase, where we systematically test advertising spend across different landing pages, formats, media, and messaging types to see what has the best conversions to actual scheduled appointments. We will also connect API's to track clients further than filling out the form, all the way to when an appointment has been scheduled, to actually optimize on who follows through on scheduling an appointment instead of just filling out the form. This will decrease the cost per scheduled appointment compared to more bloated leads that don't usually convert to contracts. We will do a vigorous amount of testing with the ad spend to see what is working and push on those positive trends in the data as hard

as we can while mitigating the losses. This is when we hone the brand voice, the ad spend allocation, retargeting, content optimization, competitive analysis, analytic analysis, and form and conversions to result in a cost of under 250 dollars per scheduled appointment. Lastly is the acceleration phase, where once we have these foundational systems working and tested, and robust, we will begin throwing gas on the fire as much as possible, and as ad spend grows, solving the problems with increased numbers of bots, lower conversion rates, and any issues we encounter that increases the cost per scheduled appointment as we scale. Sustainable acceleration and solving the problems that occur as we grow bigger will be the most important process in this step as we manage the accounts and grow the brand, and advertise more and more.

Systems here will be ranked by priority. We are building some major systems for this. We want to move fast and focus on what is important towards reaching the goal of 250 dollars per scheduled appointment.

- Get access to all media files, Meta ads account, Instagram account, and TikTok account. Create a TikTok ads account if one does not exist.
 - Dropbox
 - Meta Business Suite/Ads
 - Instagram
 - Docusketch
 - Tiktok
 - Facebook
 - Media Files/Photos
- Set up CRM notifications to trigger an email or text immediately every time a lead comes in. Test the lead flow to confirm it is working.
 - GoHighLevel creation for Joseph needs to be done ASAP
- Set up a system that constantly monitors competitors and tracks high performing ads and organic content locally and nationally on Meta and TikTok. Conduct competitive research on what ads and organic content are working right now — hooks, formats, messaging. Build a roadmap of formats to test using existing media and identify what new media needs to be filmed.

- Start by manually looking at competitors' content and creating a content strategy based on the resources available for the first month.

Once that is done, we can start automating

- Create a media needs list and set up filming dates at locations to ensure new content is captured based on working scripts if necessary. Use existing and new media to populate all accounts.
- Remodel profiles with proper graphics, story covers, and bios.
- Begin filming projects and posting on a regular basis. Cycle content every other day between platforms with SEO oriented captions for better discovery. Build organic interactions and test content for the best retention metrics and engagement.
- Combine gathered internal analytics and metrics from the organic content we are creating with competitor intelligence to create a well-informed content and ad development plan.
- Foundation is complete when we have a solid base of organic content, a clear brand voice, and are ready to begin boosting posts with ad spend. We build the foundation first to reduce wasted ad spend on initial development challenges and establish an effective brand voice before scaling into paid advertising.

- Set up a system that constantly monitors competitors and tracks high performing ads and organic content locally and nationally on Meta and TikTok. Conduct competitive research on what ads and organic content are working right now — hooks, formats, messaging. Build a roadmap of formats to test using existing media and identify what new media needs to be filmed.

- Start by manually looking at competitors' content and creating a content strategy based on the resources available for the first month.

Once that is done, we can start automating

- Create a media needs list and set up filming dates at locations to ensure new content is captured based on working scripts if necessary. Use existing and new media to populate all accounts.

- Combine gathered internal analytics and metrics from the organic content we are creating with competitor intelligence to create a well-informed content and ad development plan.
- Begin filming projects and posting on a regular basis. Cycle content every other day between platforms with SEO oriented captions for better discovery. Build organic interactions and test content for the best retention metrics and engagement.

Basically we are going to have two distinct systems. We are going to have the intelligence and analysis, that informs the next moves in terms of producing content. The next thing is we are going to create the execution system of that, which includes gathering media, and executing on it right away.

Organized Concepts

Organized Concepts

FOUNDATION PHASE

- Get access to all login information and content library.
- Set up Meta, Instagram, Facebook, and TikTok accounts properly for advertising.
- Fix the lead management system so leads stop getting lost. Every lead triggers an email notification immediately with their information.
- Set up initial forms and landing pages for lead capture across all platforms.
- Set up all tracking, analytics, and competitive analysis systems.
- Shoot and produce content and begin cyclical posting every other day rotating across Facebook, Instagram, TikTok, and Google Business Profile.
- Foundation is complete when the first ad goes live with all systems in place to begin analyzing and iterating.

TESTING PHASE

- Systematically test ad spend across different landing pages, formats, media, and messaging types.
- Connect APIs to track from form fill all the way to scheduled appointment.
- Optimize on who actually follows through to a scheduled appointment, not just who fills out a form.
- Hone brand voice, ad spend allocation, retargeting, content, and form conversions.
- Push hard on positive trends in the data while mitigating losses.
- Testing is complete when cost per scheduled appointment hits 250 dollars consistently.

ACCELERATION PHASE

- Scale ad spend toward 40,000 per month.
- Solve the problems that scale creates — bots, lower conversion rates, rising cost per scheduled appointment.

- Sustainable acceleration and solving the problems that come with growth is the most important process in this phase.

Systems (In/Out)

**Intelligence collection, analysis, and
ideation feedback loop**

Execution, finalization, and posting

Foundation Execution

Execution Timeline and Strategy

ONE-TIME EXECUTION TASKS — FOUNDATION PHASE

Access

- Get added as admin on Joseph's Facebook Business Page
- Get access to Meta Business Suite and Meta Ads account (or create one under his Business Manager)
- Get added as admin/collaborator on Instagram
- Set up ads with Ashane
- Get login or admin access to TikTok account
- Create TikTok Ads account if one does not exist
- Get access to his website
- Get access to Docusketch (or whatever folder his media files live in)
- Download and catalog all existing media files

GoHighLevel

- Create Joseph's GoHighLevel account
- Build the contact/lead form
- Connect the form to his website
- Set up email notification triggered on every new lead
- Set up SMS notification triggered on every new lead
- Test the full lead flow end to end and confirm both notifications fire

Profile Remodel

- Design profile graphics for Instagram, Facebook, and TikTok (profile photo, cover photo, highlights covers)
- Write and upload the finalized bio to all three platforms
- Build and upload story highlight covers
- Write and upload the About section using the finalized brand story copy
- Update all contact info, links, and CTAs across all three profiles

Media Audit

- Review all existing media files and tag what is usable
- Identify gaps — what formats, project types, or locations are missing
- Build the media needs list based on gaps
- Schedule filming date(s) with Joseph before Monday if any content is needed for the first post

Website Landing Pages

- Build the two GoHighLevel-integrated landing pages (one-time deliverable per contract)
- Connect landing page forms to GoHighLevel and confirm lead flow works
